

Technical specifications

Woofer diameter	6 ¹ / ₂ " (165mm)
Cone	Polyglass
Basket	ABS
Voice-coil diameter	1" (25mm)
Magnet diameter	3 ¹ / ₃ " (85mm)
Sensitivity	92.4dB
Nominal Impedance	4 Ohms
Kit bandwidth	65Hz - 25kHz
Max. power	150W
RMS power	75W
Integrated crossover	12/18dB/oct (4kHz)
Tweeter	Aluminum/Magnesium inverted dome TNB
Tweeter mounting	Molded for perfect integration in the original location

THE SPIRIT OF SOUND

Integration IFVW GOLF 6 - VOLKSWAGEN - GOLF 6 DEDICATED KIT instant gratification

IFVW Golf 6: dedicated FOCAL kit

Launched in 2010, the new FOCAL program was built around three lines made to meet different needs: Elite, Performance and Integration. The Integration line meets the following demands: "Accessibility, Easy installation, Pleasure".

In the last few years, the update of an audiophile system has become more and more complex (ergonomic loss of on-board computer control functions, remote screens, porting circuit into MOST technology, reduction of depth space for speakers...). However, our research has revealed continuing interest in audiophile sound quality, whatever the vehicle type or the driver's age.

How could we introduce an innovative, simple, efficient and perceptible method of delivering the best of sound?

Our R&D engineers have studied the question and have found a solution: a dedicated kit of the Integration line: the IFVW Golf 6 kit.

This kit is made of 2-way component speakers (a pair of woofers and a pair of tweeters) dedicated, designed and made for one vehicle. A philosophy built on enjoyment respect and accessibility to extraordinary quality!

This "plug and play" concept was made with regard to the original locations and the design created by the car manufacturer not only on the mechanic plan, but also on the acoustic plan (sound rendering

improvement, taking into account the volumes and the inherent car interior restraints). After long months of studies, research, tests, validations and listening sessions, the IFVW Golf 6 kit is born at last and now stands in a new market that's totally oriented towards pleasure and simplicity.

This "ready to play" kit joins a promising program aimed at specific vehicles sold worldwide.

IFVW Golf 6: 2-way component kit, user manual, video and specific tools for mounting. Compatible tweeter mounting, integrable and with harmonious design.

Because we make internationally recognized acoustic loudspeakers and because our R&D department innovates to supply our production workshops, we are proud to

Plug & Play, 100 % made in France!

Easy installation

By guaranteeing installation in less than an hour, keeping the original head unit, the IFVW Golf 6 kit brings a solution to all the Volkswagen Golf 6 owners who wish to discover the best of the audiophile sound. All the tools are supplied and a video shows the different steps of the installation.

Compatibility

This 2-way component kit can be installed at the front instead of the original speakers of the Volkswagen Golf 6, 3/5 doors.

Listening

The woofer is the result of a long study on the efficiency/frequency compromise and offers intense bass reproduction. The aluminum inverted-dome tweeter, hallmark of the brand, provides neutral treble reproduction, which is accurate and reliable up to the highest frequencies.

Working on the tweeter formers produced an aesthetic match with the door panel. Above all, thanks to its orientation and specific binding, the tweeter development greatly improved the original sound image (height, depth and width of soundstage). The result is a pure enveloping sound with great neutrality. Enjoy!

*Installation 100% dedicated
to Volkswagen Golf 6 in less than an hour.*
